Professional Summary

Finance and analytics professional with M.Sc. Financial Economics and 3+ years building performance dashboards, financial reporting systems, and data automation pipelines in commercial environments. At Promotech, I produce monthly CEO reporting packs covering revenue, margin, cost variance, and operational KPIs — performing deep-dive analysis on multi-source financial and operational data to surface actionable business insights. I independently built a production-grade Python data platform (multi-API ingestion, automated processing, structured analytical output) and am SQL-proficient — bringing a rare combination of economics training, automation capability, and commercial finance exposure to a data-driven digital analytics role.

Core Skills

Analytics & Data Tools

SQL | Python (Automation, Data Pipelines & Analytics) | Power BI (Dashboards, DAX) | Advanced Excel (Power Query, Pivot Tables, Financial Models) | Microsoft PowerPoint

Business & Financial Analysis

Business Performance Analysis | P&L Analysis | KPI Tracking | Revenue & Cost Analytics | Variance Analysis | Budgeting & Forecasting | Financial Reporting & MIS | Management Reporting | Scenario Analysis

Commercial & Operational

Month-End Close | Account Reconciliation | ERP Systems (Odoo, Tally) | Audit Support | Stakeholder Coordination

Professional Experience

Promotech Advertising — Dubai, UAE

Feb 2025 – Present

Accounts and Operations Executive

Business Performance Reporting & Analytics

- Build and deliver monthly performance dashboards and management reporting packs for the CEO — covering revenue, gross margin, cost variance, and operational KPI trends; perform deep-dive analysis on financial and operational data to surface actionable business insights with written commentary.
- Perform month-end financial close: account reconciliations, ledger reviews, discrepancy investigation, and pre/post-closing validation across all accounts — ensuring data accuracy and completeness before each reporting cycle.
- Track and analyse commercial performance metrics across 475 active supplier and client accounts — consolidating multi-source financial data into structured reporting for operational decision-making.
- Monitor monthly cash position and working capital trends; produce weekly liquidity analysis for management — translating operational data into actionable cash management and payment scheduling decisions.
- Support IFRS-compliant annual audit (Kreston Menon Chartered Accountants) through organised, audit-ready documentation and timely resolution of review queries.

Finance Systems & Automation

- Drove full ERP migration from Tally to Odoo — data validation, inventory database cleansing, master data review, and cross-team coordination from planning through go-live.
- Rebuilt finance function documentation from scratch; reduced document retrieval time from days to minutes through structured filing and process redesign.

Ernst & Young (EY) — Bangalore, India

Nov 2023 – May 2024

Tax Analyst

- Performed structured financial analysis across multi-client engagements — analysing high-volume financial datasets, identifying discrepancies, investigating root causes, and coordinating resolution with internal and client stakeholders.
- Reconciled financial data across multiple sources (tax forms, client records, supporting schedules) — ensuring accuracy and consistency across reporting outputs at scale.
- Built and maintained audit-ready analytical documentation under strict deadlines; coordinated with EY U.S. teams across time zones, developing cross-functional communication and deadline management capability.

Internship Experience

BB Advisory — Bangalore, India

Jan 2023

Financial Analyst Intern

- Prepared financial analysis reports and valuation models for client engagements; contributed to portfolio reconciliations and client-ready analytical deliverables.

Ernst & Young (EY) — Bangalore, India

Jan 2023 – Apr 2023

US Tax Intern

- Reviewed financial documents and supporting schedules for accuracy and compliance; validated client statements and reconciled supporting data.
- Supported documentation and financial reporting workflows requiring strong analytical attention to detail and cross-team coordination.

Projects

Multi-Source Financial Data Analytics Platform

2024 – Present

Built to reduce manual reporting overhead and enable scalable analytics at volume — production-grade automated data pipeline integrating multiple live market data APIs: real-time data ingestion, processing, validation, and structured analytical reporting outputs. Demonstrates capability in large-dataset automation, multi-source data integration, and programmatic reporting — directly applicable to commercial analytics and business intelligence workflows. Built entirely in Python.

Education

M.Sc. Financial Economics

2021 – 2023

Manipal Academy of Higher Education · Manipal, India

BBA — Finance (Major)

2017 – 2020

St. Aloysius College · Mangalore, India
